

I mean nothing to nobody Nobody means nothing to me That's how it has always been Forced to live in this fuckin' misery It's hard to choose When I am born to lose I even don't know how to tie a noose There's no reasons to live, nothing to lose I've never met anyone like me And I hope nobody will ever be Lifeless life, soulless soul Sweet death in my sight, my only goal Suicidal depression My burden with no prescription I'm scared of life, my only fear Yet I hope that my end is near All I feel is pure agony I know this place ain't for me I'm dying alive, that's already happening
